

**Farrier's  
Finish®**

## DRY HOOVES?

### Hoof Conditioner and Disinfectant

Farrier's Finish® is a liquid hoof topical that destroys the "hoof eating" microbes which cause White Line Disease and Thrush. It also helps maintain correct hoof capsule moisture balance in excessively wet or dry conditions.

**Life Data®  
Hoof Clay®**

## THRUSH?

### For Thrush, White Line Disease & Hoof Defects

Life Data® Hoof Clay® is a pliable antimicrobial clay which easily packs and remains in place within hoof defects, old nail holes and cracks. It provides continuous long-term protection against a wide spectrum of bacterial and fungal invasions which cause poor hoof quality, wall separations, crumbling horn, White Line Disease, and Thrush.

**Life Data®  
Breeder's Formula®**

## ITCHY DOG?

### For Nervous Behavior and Itchy Skin in Dogs

The average dog's diet is deficient in many of the nutrients needed to build healthy skin. Breeder's Formula® is a concentrated nutritional supplement that supplies these needed nutrients to help promote healthy skin and reduce nervous behavior in dogs. The nutrients provided are formulated to strengthen connective tissue proteins, especially collagen, thereby improving the skin's resistance to dermatitis. Breeder's Formula® also contains tryptophan and magnesium to reduce nervous behavior in dogs and lessen compulsive itching, licking, and skin chewing.

## Farrier's Formula®

### HOOF QUALITY?

#### #1 Farrier Recommended Hoof Supplement

Equine nutritional research, clinical trials and field testing have gone into every cup of Farrier's Formula® since its conception in the late 1970's. Farrier's Formula® provides nutrients such as phospholipids, omega fatty acids, vitamins, and important amino acid "protein building blocks" that enable horses to build strong structural and connective tissue proteins important for healthy hoof structure and growth.

Within weeks of feeding Farrier's Formula®, you will notice a glossy, more deeply colored coat, and an emerging new band of hoof growth.

Farrier's Formula® is the only product of its kind subjected to independent scientific research and formally published in a medical journal.

## Farrier's Formula® DS Plus Joint

### POOR JOINTS?

#### For Hoof and Joint Repair and Support

Farrier's Formula® DS Plus Joint is a pelleted formula that delivers active ingredients to repair the hooves and joints, while also restoring skin condition and hair coat color. Farrier's Formula® DS Plus Joint contains ornithine, proline, glucosamine, manganese and sulfur to provide targeted joint repair and support. The level of sulfur provided at the recommended Adult Replenishment Dosage for an average 1,000-pound horse is equivalent to 3,500 mg of MSM.

Farrier's Formula® DS Plus Joint eliminates excessive sulfur supplementation that usually occurs when supplementing other hoof and joint products separately. Farrier's Formula® DS Plus Joint provides omega 3 fatty acids, phospholipids, zinc and copper to rebuild skin and hair coat to a healthy and vibrant condition. Farrier's Formula® DS Plus Joint is suitable for all ages and work levels.

## Barn Bag®

Pleasure and Performance Horse

### EQUINE DIET?

**For Obesity, Insulin Resistance and Diet**  
The Barn Bag® Pleasure and Performance Horse, Hay and Pasture Balancer, is a low starch concentrated nutrient source designed to balance hay and pasture diets, prevent over supplementation and eliminate the feeding of compounded feeds. Barn Bag® is ideal for all adult horses including easy keepers, metabolic syndrome horses, insulin resistant horses, hard keepers, and working horses.

## Barn Bag®

Broodmare and Growing Horse

### GROWING HORSE?

#### For Broodmares and Growing Horses

Barn Bag® Broodmare and Growing Horse supplies the correct amounts of vitamins, minerals, amino acids, fatty acids and other nutrients required for pregnancy, lactation and young horse growth without the problems often associated with poor quality diets and over-supplementation.

### Compose® 2x

#### Calming Without Sedation

Compose® 2x is a pelleted concentrated calming formula for horses prone to anxiety or excitability in stressful situations. Because Compose® 2x does not contain substances or ingredients that lead to sedation or loss of alertness, it is a much safer alternative than the utilization of tranquilizers.

### Life Data® Sweat Formula

#### For Non-Sweating Horses

Life Data® Sweat Formula is formulated to enhance the ability for non-sweating horses to sweat. The active ingredients also restore skin condition.

### Life Data® Lamina Formula

#### For Acute and Chronic Laminitis

Life Data® Lamina Formula provides ingredients to support the laminae and assist in laminitis recovery. For full effectiveness, feed with Farrier's Formula®.

### Life Data® Adrenal Formula

#### For Horses Prone to Cushings

Life Data® Adrenal Formula provides active ingredients that may help improve glucose metabolism, regulate adrenal and thyroid hormones, and improve metabolism.

DVM, MS, CNS

“A complete diet is not the same as a balanced diet. In a complete diet, all the required nutrients a horse needs are present. In a balanced diet, all the required nutrients are present in the right amounts and ratios. It is very easy to give either too much or too little of a required nutrient, and one required nutrient for one horse may be toxic for another. Selenium is just one example. Through our continued research, Life Data® takes the extra step to ensure our products provide these essential nutrients in the correct amounts and ratios, thus providing a balanced diet that fits your horse's specific needs.”
